

RE: MANTL ARTIFICIAL LIFT ACQUIRES SUCKER ROD SERVICES DIVISION FROM FORCE INSPECTION SERVICES

LLOYDMINSTER, AB, June 1, 2024 – MANTL Canada Inc., an independent, Canadian manufacturer and distributor of complete Progressing Cavity Pump systems, has acquired the sucker rod services and guide installation division of Force Inspection Services.

MANTL will continue sucker rod operations and guiding services with no interruptions, utilizing the same location, equipment and talented staff. MANTL is celebrating their 10th year in the Artificial Lift industry and brings expertise across 10 western Canadian locations.

“We are extremely pleased to be bringing this service to our customers,” said Mattew Kenna, President & CEO of MANTL. “We are confident the reputation for quality products and service will translate well into this new division for our company.”
